0.9	0.373416	0.373416	0.176774	0.176774	26.0	26.0

Cluster remarks

- Cluster usage is frustrating
  - Can't connect to specific nodes
  - GPU on some nodes doesn't work consistently
- Access specific node on the cluster
  - weird nodelist naming?

Questions

1. Use 1.0 for precision if no predictions are made? (TP/ TP+FP) where TP+FP=0

2. Do I need to explain strongly labeled data?

3. Use 'we' or 'I' in the thesis?

4. Spelling of dataframe/dataset (data frame/data set)

5. Should images/graphs/tables go in the appendix?

6. How should I reference contributions to lhotse?
